

Background :-

- Atliq Technologies is a software and data solutions company.
- Atliq has a head office in Delhi with regional offices spread across India.
- Bhavin patel is the sales director of the company
- Pinali Mindali is the HR manager of the company and wants some key insights regarding the company's human resources
 - Wants to know the working preference of employees and find the reason behind the same
 - Understand the attendance and presence of employees
 - Plan important team building activities or events on day when most employees are present
 - Sick Leave % and the reason behind this.

Project Atliq Hardware:-

- Create an automated dashboard providing quick, latest & recurring insights on employees and their attendance

Tasks

- Import data into Power BI
- Understand data and flaws
- Very unorganized data with date in columns, so organize it
- Transform data into four major columns:- Month, Employee Code, Employee Name, Date and Attendance
- Create an automated template that converts new data into a concise format such that new data is loaded into the existing data set
- Dashboard should automatically update every time new data is added
- Create specific measures to meet demands of Mrs Pinali
- Make sure dashboard is interactive and fulfills all requirements and insights that Mrs Pinali is looking for
